

JUNED PATHAN

+91 8830026164 junedp068@gmail.com [GitHub](#) [LinkedIn](#) Shrirampur, India

Professional Summary

Software engineer specializing in MERN stack development with hands-on experience building scalable full-stack applications, RESTful APIs, and AI-powered web platforms. Proficient in React.js, Node.js, Express.js, MongoDB, and modern JavaScript ecosystems, with a strong foundation in software engineering principles and backend development.

Technical Skills

Languages: JavaScript, TypeScript, Python, C, C++, SQL

Frontend: React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication

Cloud / DevOps: Docker, AWS (VPC, EC2, ECS, ECR, IAM)

Database: MongoDB, MySQL

Tools: Git, GitHub, Postman, Cloudinary, VS Code, Cursor IDE

Core Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems, and Computer Networks.

Experience

Web Developer Intern | CodSoft

Jan 2024 – Feb 2024

Remote, Kolkata, India

- Created responsive web applications including a personal portfolio website, a Starbucks landing page, and a JavaScript calculator, ensuring cross-browser compatibility across 15+ screen sizes.
- Built modular UI components using HTML, CSS, and JavaScript, reducing redundant styling by 40% and improving code maintainability.

Web Developer Intern | Infotact

Sep 2025 – Nov 2025

Remote, Bangalore, India

- Developed 12+ RESTful API endpoints for a service booking application and a handmade products marketplace, reducing search response latency by 35% through middleware and routing optimizations.
- Implemented JWT-based authentication with role-based access control (RBAC), securing backend routes against unauthorized access and improving session reliability.

Projects

Devin-AI Platform | [GitHub](#)

Tech Stack: MongoDB, Express.js, React.js, Node.js, Socket.IO, JWT, Google Gemini API, Tailwind CSS

- Designed a full-stack AI developer platform featuring real-time collaboration with Socket.IO, Google Gemini API integration, and JWT-based authentication, improving collaboration efficiency through real-time synchronization.
- Implemented client-server communication and dynamic file system management, reducing session handling overhead by 38% and increasing real-time interaction performance by 32%.

Scalable URL Shortener | [GitHub](#)

Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Redis, JWT, React Query, React Router, NanoID, REST APIs

- Built a production-ready URL shortener using React.js, Node.js, Express.js, and MongoDB with a modular architecture (routes, controllers, services, and DAO), featuring JWT authentication, MVC architecture, custom aliases, click analytics, and secure REST APIs, reducing code complexity by **60%**.
- Enhanced URL resolution by integrating **Redis caching** and **MongoDB indexing**, improving lookup latency by up to **70%**, while designing a scalable architecture supporting load balancing, horizontal scaling, and CDN-ready deployment.

AI Interview Preparation Platform | [GitHub](#)

Tech Stack: React.js, Node.js, Express.js, MongoDB, Google Gemini 2.5 Flash, Zod, Puppeteer, JWT, SCSS

- Designed an AI-powered interview preparation platform that analyzes resumes and job descriptions to generate structured interview reports, skill-gap analysis, and technical and behavioral questions, achieving **95%+ schema-valid AI responses** using Gemini and Zod.
- Developed secure JWT authentication with token blacklisting, PDF resume parsing, and AI-generated ATS-friendly resume export using Puppeteer, reducing manual interview preparation time by **70%**.

Education

Bachelor of Engineering in Computer Engineering

2021–2025

PVGCOE, Nashik

CGPA: 7.26/10

Achievements

- Solved **150+** DSA problems on **LeetCode**, covering arrays, trees, graphs, and dynamic programming.
- Earned the **TCS iON Young Professional Certification**, covering professional communication, AI fundamentals, and workplace readiness.
